DELIVERING MORE INTELLIGENT IT WITH HPE INFOSIGHT

An innovative AI solution from HPE, InfoSight utilises cloud-based machine learning to deliver valuable information on the health of your infrastructure, helping to safeguard against the threat of disruption and delays all too common in modern IT.

By creating a smarter and more autonomous data centre infrastructure, Infosight helps you manage this complex, challenging environment while simultaneously supporting digitally-powered solutions, improving customer experiences, and freeing up valuable employee time. It also has the added advantage of working across the HPE Proliant, Synergy and Apolloservers and Nimble storage ecosystem, bringing together the insights and operational enhancements these systems offer.

What do you get with HPE Infosight?

86% OF PROBLEMS AUTOMATICALLY PREDICTED AND RESOLVED*

85% LESS TIME SPENT ON MANAGING PROBLEMS*

54% OF PROBLEMS RESOLVED BEYOND STORAGE*

* Based on HPE Nimble Storage's installed base

Make the complex simple

By leveraging all available data, InfoSight not only simplifies the management of your IT infrastructure, but also gives you security recommendations, tells you how you can improve performance and helps you plan for the future by monitoring your bandwidth needs. And, thanks to its cloud-based nature, it's easier than ever for you to take advantage of all of this information.

Infrastructure innovation

Traditional infrastructure wasn't built to effectively deal with the data that businesses now produce, so IT departments are increasingly having to react to problems rather than proactively utilise the available technology. Because HPE Infosight can analyse millions of sensors every minute, your system will not only get smarter but also more reliable, meaning you can now attribute resources to high-yield projects instead of infrastructure management.

Global visibility into server and storage infrastructure

Predictive analytics driving analysis, detection, prevention and resolution

Recommendation engine

WHY ULTIMA?

As a trusted partner of HPE, and with a proven track record of delivering and supporting successful Infosight deployments, you can be sure we're the perfect people to help you meet your infrastructure demands.

We have the expertise to deliver and manage HPE technology that automates and optimises data centres across multiple industry sectors and use cases - we've even helped major retailers keep pace with Amazon by improving their infrastructure management, in turn increasing efficiency and enabling retail transformation.

Get in touch today and organise a meeting with one of our experts to learn how you can use Infosight to deliver superior solutions and improved customer experiences. You can also find out more at **ultima.com/hpeinfosight**
